SERVICE CLASSIFICATION NO. 10 (Cont'd)

PURCHASE OF ELECTRIC ENERGY AND CAPACITY FROM CUSTOMERS
WITH QUALIFYING ON-SITE GENERATION FACILITIES (Cont'd)

SPECIAL PROVISIONS (Cont'd)

- B. The Company will be relieved of its obligation to purchase energy during any period in which the Company suffers a system emergency. In such circumstances, the Company will notify the Customer to cease supplying energy to the company. For purposes of this Provision, a System emergency is defined as a condition which is imminently likely to endanger life or property or result in significant disruption of service to any Customer.
- C. If the measured demand exceeds the current Contract Demand by 10 percent or less, a surcharge equal to 12 times the monthly Contract Demand charge for such excess demand will apply to that monthly bill, and the Contract Demand will then be determined in accordance with the provisions of Determination of Demand above.
- If the measured demand exceeds the current Contract Demand by more than 10 percent, a surcharge equal to 24 times the monthly Contract Demand charge for such excess demand will apply to that monthly bill, and the Contract Demand will then be determined in accordance with the provisions of Determination of Demand above.
- D. A Customer may, upon 30 days' written notice to the Company, withhold a portion of their measured total energy output. In the event the Customer delivers less than the measured output of the qualifying generating facility, the energy delivered shall be assumed to be made proportionately as to the generation along the load curve of the qualifying generating facility for those facilities whose output is measured by a continuous recording demand meter, or proportionately as to the On-Peak and Off-Peak generation for those facilities whose output is measured by a time-differentiated kilowatthour metering device, in either case as such output is actually experienced during the period in which less than the measured output is being delivered.
- E. Qualifying small, random suppliers of energy (such as windmills) may elect to sell their output to the Company on a non-time differentiated basis. Deliveries will be measured using a standard kilowatthour meter. The Customer will pay the installed cost of the necessary metering equipment at the time of installation in lieu of all Metering, Minimum and Distribution Demand Charges otherwise applicable under this Service Classification. This Provision is limited to secondary single phase service.
