Charges for Service Supplied by Providers Other than the Company

In cases where Central Hudson is performing the billing function for the alternate energy supplier, the customer will be required to pay for all energy scheduled on its behalf at the supplier's price. For deliveries in excess of the customer's usage, the customer will be credited the lower of the customer's purchase price per MWH for the delivered energy or Central Hudson's Adjusted Average Cost of Fuel - EVOP. The customer will be billed for under deliveries or no deliveries at the greater of Central Hudson's Adjusted Average Cost of Fuel - EVOP or the real time incremental cost.

In a two-bill scenario, the alternate energy supplier will be credited for over deliveries at the lower of Central Hudson's Adjusted Average Cost of Fuel - EVOP or the real time incremental cost. The alternate energy supplier will be billed for under deliveries and no deliveries at the greater of Central Hudson's Adjusted Average Cost of Fuel - EVOP or the real time incremental cost.
