**SERVICE CLASSIFICATION NO. 10**

**NATURAL GAS SUPPLY POOLING SERVICE**

**APPLICABLE TO THE USE OF SERVICE FOR:**

Natural Gas Supply Pooling Service to customers who have executed an Agency Agreement for Gas Supply Pooling Service and a Transportation Service Agreement pursuant to this Schedule, provided the Company has adequate facilities and capacity available for the requested service without jeopardizing the Company's ability to meet the expected demand of its firm customers.

**CHARACTER OF SERVICE:**

The Company, acting as agent on behalf of the Customer, shall purchase gas, arrange for transportation, nominate the gas quantities and administer the gas accounting functions to provide natural gas deliveries on an interruptible basis, as specified each month, to a city-gate receipt point(s) within the Company's service territory to which this Schedule applies. The Customer shall at all times retain title to gas supplied under this service classification. Deliveries from the Company's city-gate receipt point to the Customer's facilities shall be pursuant to the Customer's applicable transportation service classification. The Company may administer separate "Pools" for each upstream pipeline which have a direct connection with the Company. Each "Pool" shall have separate pricing and operational provisions.

**PRICE: (Per Month)**

The price shall, on average, be the weighted average cost of gas supplies used to meet the "Pool" requirements, plus the applicable costs of transportation used to deliver the gas to city-gate receipt points, including penalties, applicable taxes and surcharges.

**CUSTOMER NOMINATION:**

Customer nominations are due approximately three (3) business days prior to the deadline for the applicable upstream pipeline nominations for gas flowing on the first day of the following month. The exact time and date shall be posted each month. Such nomination shall represent a binding commitment on behalf of the Customer to receive and pay for the quantity of gas nominated. The nomination must include a profile of the Customer's expected load, which states at a minimum, the estimated daily load for each day of the period to which the nomination applies.
