SERVICE CLASSIFICATION NO. 14 (Cont'd)

STANDBY SERVICE (Cont'd)

INTERCONNECTION REQUIREMENTS AND FEES

The Customer must have an interconnection agreement with the Company and must meet all Company interconnection requirements. If the Customer does not have an effective interconnection agreement with the Company, the Company shall have the right to back-bill the Customer as stated in the Special Provisions section of this Service Classification.

The Customer shall be required to pay for any and all costs that the Company incurs related to the generator that supplies the Customer. These costs include, but are not limited to system modifications, cost of capital, transformers, metering, administration, engineering review, system studies, application fees and all verification tests.

METERING

Interval metering and remote meter reading capability are required of all Customers with electric loads of 50 kW and greater.

Customers with electric loads of 50 KW and greater shall be responsible for the following:

All meter and installation costs.

All costs associated with providing telecommunications to the meter to enable remote meter reading capability.

Customers with electric load below 50 kilowatts have the option of installing interval metering at their cost and taking service using the Daily-As-Used rate based on their Parent Service Classification. Customers electing to install interval metering shall be responsible for the following:

All meter and installation costs.

All costs associated with providing telecommunications to the meter to enable remote meter reading capability.

Customers who do not elect to install interval metering and their Parent Service Classification requires demand metering shall continue to use the demand metering and will be subject to the monthly demand rates of the Parent Service Classification. Customers whose Parent Service Classification does not require demand metering shall not be required to install interval or demand metering. If the Customer elects not to install interval metering, the Customer's Daily As-Used rate will be charged on a kilowatt per hour basis.
