SERVICE CLASSIFICATION NO. 6 (CONT'D)
Large General Service

MINIMUM ENERGY CONSUMPTION:

Customer shall agree to use a minimum of 9,500,000 KWHrs per year and shall further agree to use or pay for a minimum of 9,500,000 KWHrs per calendar year or rate shall be charged as a Service Classification No. 4 (Large Commercial).

DETERMINATION OF DEMAND:

The maximum on-peak demand used for billing shall be taken as the greatest average fifteen minute use of electrical energy during the month between the hours of 9:00 A.M. and 10:00 P.M. The demand outside these hours will be considered off-peak and shall not exceed the on-peak demand by more than 1000 KW. The minimum demand shall not be less than fifty percent (50%) of the highest demand established in the preceding eleven (11) months.

The maximum demand shall be measured by fifteen minute KW demand meters furnished and installed by the Plattsburgh Municipal Lighting Department.

ON SITE GENERATION:

Customers providing on-site generation (providing that such agreement is set by individual contract) for a portion of his load, shall bear the expense and responsibility of parallel operation of such generation with the Plattsburgh Municipal Lighting Department system and shall supply, install and maintain all required protective, reverse power flow, load controllers, etc. equipment necessary to afford total and absolute integrity of the Plattsburgh Municipal Lighting Department system. The billing demand, energy charges, etc. will be the amount contracted for, unless the measured demands exceed contracted demands. If this circumstance occurs, such measured demand will become the billing demand.
