**SERVICE CLASSIFICATION NO. 6****APPLICABLE TO USE OF SERVICE FOR:**

Firm transportation of customer-owned gas within the Company's service territory when a customer, participating in the Company's Gas Transportation Service Program described in Rider A, has a current, fully executed contract with a Qualified Seller ("Seller") and the Seller has agreed to the terms and conditions of Service Classification No. 11 or 12. Seller will be required to purchase pipeline capacity from the Company pursuant to the Section on Capacity Release as specified in Service Classification No. 11, or otherwise obtain capacity as specified in Service Classification No. 12, to deliver the daily quantity of natural gas specified by the Company to the boundary of the Company's service area. The Company will receive the gas on behalf of the customer and will redeliver the gas on a firm basis to the customer.

The annual volume scheduled to be transported shall not be less than 3,500 Mcf for an individual customer or 5,000 Mcf for an aggregated group of customers served by a common Seller. Said usage level must have been maintained for each of the two twelve-month periods preceding application for service hereunder. For a customer, or customers in the case of an aggregated group, without two years of billing history, annual usage will be determined by the Company.

A customer is limited to one Seller of gas for each account for which the customer receives transportation service. A Direct Customer must meet the requirements of a Seller specified in Service Classification Nos. 11 or 12.

A customer electing service under this Service Classification must select either the Balancing Service Option or the Functional Storage Service Option as specified herein.

**CHARACTER OF SERVICE:**

Firm transportation of natural gas for a customer, which the Seller has arranged to have transported to a pipeline delivery point (delivery point) at the boundary of the Company's service area. Such gas will be accepted by the Company at the delivery point and transported to the customer's facility. The Company shall control the receipt of such gas at the delivery point, and will provide gas as required by the customer.
