APPLICATION FOR SERVICE:

Written application for service upon Form "M6" is required to which a schedule, designated Schedule "SL6", shall be attached. The Schedule "SL6" will list the specific equipment and quantities initially supplied and the applicable annual unit charges. Such application and attached schedule, when accepted by Company, shall constitute an agreement between Customer and Company subject to the terms and conditions set forth in this Service Classification.

RATE:

The offer of service under this Service Classification is limited to services as set forth below. The charge for service during each month shall be for lamps in service as of the last billing month. Any lamps added to or deleted from service subsequent to the last billing period will be prorated based on the number of days in service.

Basic Service

The basic charge for service during each calendar month shall be the sum of the energy charge based on the determined consumption of energy, plus one-twelfth (1/12th) of the annual lamp maintenance charge, plus the appropriate adjustment to charges.

A. Energy Charge

\$0.07225 per kWh

The monthly lamp energy consumption stated in kWh will be determined by multiplying the total wattage for all lamps connected, by the number of burning hours for the particular month, and dividing by 1,000. The following tables are used for this purpose.
