II. 20.f. CONTINUED

(7) Transfer of Gas Service

In the event that a customer is authorized (by the Company or by the Public Service Commission, whichever is required in each instance) to transfer an existing gas allotment to a different location, the customer must pay for all costs associated with the installation of a new service lateral or main extension if these facilities do not exist at the new location. This tariff provision is to be effective only when the Company has effective tariff leaves which prohibit the utility from attaching any new or increased gas service.

(8) Outdoor Gas Lighting

The Public Service Commission has prohibited the use of natural gas in gas-fired decorative torches. A decorative torch is defined as any device in which gas is used as a fuel to produce an open flame, whether or not the flame is open to the atmosphere or enclosed in glass or other appropriate covering. Service is permitted for outdoor lighting fixtures in which a mantle is employed that enables the gas to be converted to useful lighting.
