RECEIVED: 04/06/98 STATUS: Cancelled EFFECTIVE: 05/01/98
SERVICE CLASSIFICATION NO. 3 (CONT'D)

SPECIAL PROVISIONS: (continued)

C. Customer, in taking three-phase electric energy shall maintain as nearly as is reasonably possible, equal currents in each o-f the three-phase conductors at the pint of taking. If at any time the current in any phase conductor shall exceed the average of the currents in all the three-phase conductors by more than five (5[^]), the amount to be paid by the customer for the period within which the unbalance occurred, may be increased by a percentage equal to that of the unbalance.

D. The customer will normally be required to maintain a power factor at the point of delivery of between 90 percent lagging and 90 percent leading. Should the customer fail to do so within 90 days after notification, the Village shall install the necessary corrective equipment. Such work performed by the Village will be charged for on the basis of current labor and material costs plus a charge of 40 percent to cover indirect overhead cost.

E. Standby or breakdown service will be furnished under this classification to a customer part or a 11 of whose source of energy, whether electrically or mechanically produced, shall be introduced or permitted, directly or indirectly, in connection with the operation of customer's equipment. For such service the monthly charge shall be not less than for the maximum demand in any of the preceding 12 months.

F. Customers electing to furnish, install and maintain their own transformers and accessory equipment, and who are served by the Village 2400 or 4160 volt system, shall receive a discount of 5% on their billing and net energy charge.

PURCHASED POWER ADJUSTMENT:

The charges set -forth in this service classification shall be subject to a purchased power adjustment as explained in the NYMPA generic tariff.

The charges billed under this section shall be subject to the late payment charge.
