 SERVICE CLASSIFICATION NO. 11
 LOAD AGGREGATION (continued)

Pooled Balancing Service (continued)

b. Balancing Requirements The balancing obligations of an aggregator operating a Pooled Balancing Service pool are as follows:

(i) Maximum Delivery Quantity MDQ. Prior to the beginning of each month, NMGas will notify the Customer or aggregator of their MDQ for the upcoming month. The Customer or aggregator will then have the right to request a change in their MDQ. Customers may request changes to the MDQ during the month but such changes will be made at the sole discretion of NMGas. NMGas has the right to change the MDQ during the month on notice to the Customer or aggregator no later than 3:00 p.m. Eastern Time on the second day prior to the effective date of the change. For any deliveries in excess of the MDQ during the month the Company may reject the excess nomination or purchase the excess quantities at the following prices:

Daily Imbalance Level	Payment Per Therm
0 to 2%	WACCOG
>2% to 10%	90% of WACCOG
>10% to 15%	80% of WACCOG
>15% to 20%	70% of WACCOG
>20%	60% of WACCOG

WACCOG is equal to the Average Commodity Cost of Gas as defined in Rule No. 17.10.3.1.

(ii) Monthly. An aggregator will be subject to a monthly cashout and/or imbalance trading in accordance with Rule 29 of this tariff based on the difference between the aggregate usage of the customers in the aggregator's pool during the month and the total deliveries of gas to the Niagara Mohawk system by or on behalf of the customers in the pool during the month. Pooled Aggregation customers will be charged a monthly balancing rate per therm calculated in accordance with Rule 17.14 of this tariff multiplied by their MPDQ.

(iii) Forced Balancing Operational Flow Order. During any period in which the Company's ability to accommodate imbalances is restricted or impaired, Niagara Mohawk may, upon eight hours' advance notice, impose a Forced Balancing Operational Flow Order ("Forced Balancing OFO"). When a Forced Balancing OFO is imposed for underdeliveries, usage by customers for whom an aggregator is providing Pooled Balancing Service must not
