Agreement Application for the Transportation of
Customer-Owned Gas
Form "T" (continued)

For Service Classification No. 8 (continued)

The Customer agrees to the installation of any special equipment for monitoring the Customer's total gas use at the Customer's premises. The Customer agrees to the responsibility for the cost of all such required equipment and associated costs. The Company will install and maintain such equipment. The Customer agrees to cooperate with the Company for the installation of such equipment and the necessary telephone and electrical circuits required for such monitoring.

The Customer _____ (agrees or does not agree) to elect standby sales service in addition to gas transportation service. If standby service is selected, the Customer must comply with the conditions set forth in Special Provision M of Service Classification No. 8 and hereby specifies the following nominations for the Daily Nominated Contract Demand of _____ Dths. Changes to the Daily Nominated Contract Demand will be granted, providing that the Customer's request for change is provided to the Company in writing by May 1, of each year, to be effective June 1.

For Service Classification No. 5 Interruptible

For interruptible transportation service, the Customer agrees that the base rate of transportation service will be _____ per therm plus applicable surcharges for a term of _____ (up to one year). The base rate will remain fixed for the term of the rate, however, the surcharges are subject to change.
