DEFINITIONS: (continued)

- (m) Current Commodity Cost Rate means a rate per therm equal to the Monthly Commodity Cost of Gas from the Company's gas supplier(s) divided by the quantity of gas used in the computation of said cost. The resulting rate will be adjusted by the Factor of Adjustment as defined in Rule 17.1. RATE:

The charges for service under Service Classification No. 9 shall be as stated in the negotiated Service Agreement. The charges will include the following items as applicable: Company transportation, sales service charges, Rollover charges, Cashout Charges and penalty charges.
