Service Classification No. 11 Uncompressed Natural Gas Vehicle Transportation Service (continued) (Rate Code: 802)

Imbalance between Receipts and Deliveries of Customer-Owned Gas

The Customer shall schedule deliveries to the Receipt Point so that, as near as may be possible, the Customer's daily consumption shall equal the Daily Delivery Quantity. Gas supplied hereunder is in addition to and not part of the Company's system requirements. At the end of each month, the Company will determine the net amount of surplus or deficiency in deliveries of gas to the Customer's usual service point above or below the volume of gas transported to the receipt point to the Company's service area adjusted for losses. The Company shall, within existing limitations of its system, provide for a balancing between the Customer's gas requirements and volumes made available during any hour or day. As part of this balancing, the Company shall deliver, within existing limitations of its supply and system, volumes of gas in excess of maximum hourly and daily volumes of gas made available to the Company by the Customer and bill the Customer for these volumes at the Effective Rate for Service Classification No. 9. The Company shall adjust any net surplus delivered by reducing the volumes of gas dispatched to the next succeeding month.

Terms of Payment:

Net cash, subject to late payment charge in accordance with provisions of Rule II.E.2.

Term:

Terminable by the Customer on five days written notice to the Company and by the Company in the manner provided by law and the rules and regulations of the Company.

Special Provisions:

- Service furnished under this service classification shall be separately metered and shall not be substituted for nor used interchangeably with service under any other Service Classification.
- Service rendered hereunder shall be for a single Customer at a single b) location. Individual agreements are required for each location.
- Loss Allowance: Charges for gas are applicable to quantities metered at the Customer's Delivery Point. As an allowance for losses incurred in the process of delivery, the Customer shall provide the Company with a volume of gas equal to four percent of the amount received for the Customer at the Receipt Point to the Company's Service area.
- d) Remote reading devices are required for all customers contracting for this service. Customers will be required to pay, prior to the initiation of service, the additional cost of the remote device in excess of a regular meter. Customers will bear all telephone charges for communicating meter usage information to the Company.
