SERVICE CLASSIFICATION NO. 3 (Cont'd)

LARGE POWER PRIMARY SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

3.3 (Cont'd)

owning or operating such equipment may be required to comply with additional measures to ensure the safety of the local feeder line.

Wiring and switches of these facilities may be arranged in parallel so as to permit the flow of current from the Customer to the Company and vice versa. The quantity of energy sold to the Company will be measured by a non-demand, non-time differentiated watthour meter. Customers owning or operating farm waste electric generating equipment who satisfy all installation and operation requirements will be allowed to combine their energy purchases from and sales to the Company in a billing period. In the event:

- (i) the amount purchased from the Company exceeds the amount sold to the company (net purchases) in a billing period, the Customer will be billed for the difference at applicable rates specified in this Service Classification.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales), the difference will be transferred to the following billing period and added to amounts sold by the customer in that period. In that latter period, differences will either be billed at applicable rates as in (i) above, or transferred to the following billing period depending on whether the differences represent net purchases or net sales, repectively.
- (iii) the difference at the end of twelve (12) months from the time the Customer contracted for this service represents net sales to the Company, the Company will pay the Customer for this difference at Energy only Contract rates pursuant to Service Classification No. 10.
