SERVICE CLASSIFICATION NO. 9 - Continued

TRANSPORTATION SERVICE - Continued

Miscellaneous Provisions - Continued

(D) Interruptions of Service and Reserve Requirements for Interruptible and Off-Peak Firm Customers - Continued

The Customer shall permit Company representatives access to the Customer's premises at any time without prior notice to inspect the Customer's facilities and equipment to:

- (1) determine whether the Customer is using gas during a service interruption, or
- (2) verify the accuracy of the meter or the condition of the remote monitoring equipment or alternate fuel or alternate energy equipment. This inspection shall not satisfy the Customer's obligation to notify the Company of any condition that would prevent the required interruption of gas service and shall not exempt the Customer from any applicable Charges for Unauthorized Use.

(E) Customer Responsibility

Interruptible and Off-Peak Firm Customers with dual-fuel equipment must maintain (i) operable dual-fuel facilities and associated Customer-installed phone lines and (ii) fuel reserves for use in such dual-fuel facilities in accordance with Miscellaneous Provision D of this Service Classification, including replenishing such fuel inventory during and after an interruption, to the extent necessary, that together are adequate to enable the Customer to operate satisfactorily those facilities without gas whenever and so long as service under this Service Classification is interrupted.

Interruptible and Off-Peak

Firm Customers with equipment that operates solely on gas must maintain (i) alternate energy facilities and associated Customer-installed phone lines, and (ii) alternate energy reserves for such facilities in accordance with Miscellaneous Provision D of this Service Classification, including acquiring additional energy reserves during and after an interruption to the extent necessary, that together are adequate to supply the energy requirements of the premises otherwise supplied directly or indirectly by the gas-fired equipment whenever and so long as service under this Service Classification is interrupted. The Company may require the Customer to provide documentation of such dual-fuel or alternate energy facilities or reserves, as applicable.

Power Generation Customers must maintain operable Emergency Low Gas Inlet Pressure Trip Switch, Gas Telemetry Equipment, and any other equipment the Company deems necessary to provide service.
