## GENERAL RULES

### 8. Customer Use of Generating Equipment – Continued

#### 8.4 Interconnection and Operation

The following interconnection and operation requirements are applicable to Standby Service Customers served under General Rule 20 and Buy-back service Customers served under SC 11.

8.4.1 The following provisions are applicable to interconnection and operation of private generating facilities (or wholesale generating facilities for Standby Service) on the premises not connected directly to transmission facilities (that is, delivery facilities other than distribution facilities) that: (i) commenced operation prior to February 1, 2000; or (ii) commenced operation between February 1, 2000 and December 30, 2004, and either have a total nameplate rating between 301 kVA and 2 MW or are connected in parallel with the network system; or (iii) commenced operation between December 31, 2004 and April 28, 2016, have a total nameplate rating greater than 2 MW, and are connected in parallel with the distribution system; or (iv) commenced operation after April 28, 2016, have a total nameplate rating greater than 5 MW, and are connected in parallel with the distribution system. The Company's distributed generation guides (the "guides") on the Company's website address installation and upgrades of electric generation facilities. When the guides are revised, they will be posted to the Company's website.

##### (A) Interconnection Charges

The Customer will be required to pay:

- (1) A charge for the reasonable costs of connection, including the costs of initial engineering evaluations, switching, metering, transmission, distribution, safety provisions, engineering, administrative costs, and any associated tax expenses incurred by the Company directly related to the installation of the facilities deemed necessary by the Company to permit interconnected operations with a Customer, to the extent such costs are in excess of the corresponding costs which the Company would have incurred had the Customer not taken Standby Service or Buy-back service. All such facilities will remain the property of the Company. The Customer may pay for the foregoing interconnection costs either:
  - (a) by paying in full prior to the commencement of Standby Service or Buy-back service; or
  - (b) by paying at least twenty-five percent of the interconnection costs prior to the commencement of Standby Service or Buy-back service and arranging with the Company to pay over not more than a five-year period the balance of such interconnection costs plus interest at the other Customer provided capital rate in effect at the time a payment plan is agreed upon with the Company. The Company may require a Customer to provide adequate security for the payment of the balance of the interconnection costs due the Company under the payment agreement.
