GENERAL INFORMATION – Continued

63. Firm Gas Demand Response (“DR”) for Commercial, Industrial and Multi-Family Customers

1. Definitions – the following terms are defined for purposes of this Program only:

“**Aggregator**” means an entity that aggregates and represents load and is responsible for the actions of its customers with respect to the Company’s DR programs. Such an entity may also assist customers and property owners/managers with DR program participation. Third-Party Aggregators may have one or more accounts enrolled in the Company’s Commercial, Industrial and Multi-Family Programs during a given season. Aggregators will only aggregate accounts within the same program option.

“**Aggregation**” refers to the summation of customers and their respective load represented by an Aggregator within a Network.

“**Agreement**” means the Customer’s application accepted by the Company, including all related exhibits, schedules, supplements, or attachments thereto, and the terms and conditions (“Terms and Conditions”). In the event of conflict between the Application (or any related exhibits, schedules, supplements, or attachments thereto) and the Terms and Conditions, the Terms and Conditions shall govern.

“**Customer**” means the firm, commercial, industrial, or multi-family customer maintaining an account for natural gas service with the Company, in the Company’s service territory (excluding Staten Island) and that satisfies the Program requirements, as determined by the Company.

“**Customer Data**” means all data and information collected by the Company from Customer in respect of the Program, including, but not limited to (a) data and information collected by Metering Equipment, and (b) other data and information collected for the purposes of determining (i) the amount of payments (if any) to be remitted to Customer in accordance with the Agreement, and (ii) Customer’s compliance with Program requirements and the Agreement.

“**Daily Demand Response Program**” or “Daily DR Program” is a program for large firm Commercial, Industrial and Multi-Family customers capable of reducing peak day gas loads for a period of up to 6 or 8 hours on event days. Customers must have the ability to reduce gas consumption by shutting off non-heating gas equipment or switching to a backup, non-gas heating fuel source.
