PASNY DELIVERY SERVICE

General Provisions - Continued

Value Stack Tariff for PASNY Customer-Generators – Continued

Definitions, applicable to the Value Stack Tariff only - Continued

“Remote Net Metering” or “RNM” refers to excess energy produced by a PASNY Customer’s electric generating equipment that is applied to that PASNY Customer’s other electric accounts pursuant to the RNM conditions section of this provision.

"Residential Customer" refer to any person who, pursuant to an application for service made by such person or a third party on their behalf, is supplied directly by the Company with electric service at a premises used in whole or in part as their residence where:

- a. the Schedule for Electricity specifies a residential rate;
- b. service is primarily used for the Customer's residential purposes, the Customer has so notified the Company, and the Customer is receiving service under a rate not normally used for residential service; or
- c. the Company knows or reasonably should have known that any such service is provided through a single meter to both units of a two-family dwelling;

provided, however, that no person who is supplied service to an entire multiple dwelling or for the common areas of a multiple dwelling as defined in the Multiple Dwelling Law or the Multiple Residence Law shall be considered to be a Residential Customer.

“Stand-alone Electric Energy Storage,” for the purposes of this Value Stack Tariff for PASNY Customer-Generators, includes regenerative braking, whether or not paired with a separate battery, and Vehicle to Grid (“V2G”) systems with a rated capacity of not more than 5,000 kW.

“Value Stack,” for the purposes of this Value Stack Tariff for PASNY Customer-Generators, refers to Value Stack Phase Two as described in Rider R of the Schedule for Electricity for Value Stack Capacity Components, Demand Reduction Values, and Locational System Relief Value.

Application for Service

The Company may require PASNY or any PASNY Customer to furnish to the Company a written request for service in a form suitable to the Company.

Requirements for Parallel Operation:

Electric generating equipment may be operated in parallel with the Con Edison system under this provision under the following conditions:

- (1) The generating equipment must be designed, installed, interconnected, tested, and operated in accordance with applicable government, industry, and Company standards and must comply with the standards contained in the SIR.
