2. Definitions:

- a. “Delivery Service Revenue Target”: For residential service classifications, shall be based on combined residential service classification base delivery revenues for each month; and for general service classifications, shall be based on individual service classification base delivery revenues for each month. Delivery Service Revenue Targets for each of the Rate Years are set forth in the Joint Proposal dated February 19, 2016 in Case Nos. 15-E-0283, 15-G-0284, 15-E-0285, and 15-G-0286, as approved by the Commission on June 15, 2016. The Delivery Service Revenue Target for Rate Year 3 shall repeat annually until changed by the Commission.
- b. “Actual Billed Delivery Service Revenue”: For the purpose of RDM, shall be measured as the sum of the billed base delivery revenues from all customers for each service classification. Base delivery revenues include revenues related to the Customer Charge, Demand Charge (per kW), Reactive Charge (per rkVAh), Energy Charge for delivery (per kWh), Contract Demand Charge (per kW), and As Used Demand (per kW). For purposes of this calculation, revenues related to the System Benefits Charge (SBC), Rate Adjustment Mechanism (RAM), Merchant Function Charge (MFC), Transition Charge (Non-Bypassable Charge [“NBC”]), Reliability Support Services Surcharge (RSSS), and New York Power Authority (NYPA) supplied usage are excluded. All sales to customers with economic development discounts or low income bill credits shall be calculated at standard service classification rates.
- c. “Rate Year”: For the purposes of RDM, Rate Year 1 shall be effective through April 30, 2017. Each Rate Year thereafter shall begin on May 1 in all subsequent 12-month periods.
