## GENERAL INFORMATION

### 13. SERVICE CLASSIFICATION RIDERS (Continued)

#### RIDER F (Continued)

#### DISTRIBUTION LOAD RELIEF PROGRAM

#### RESERVATION PAYMENT OPTION (Continued)

(E) Performance Factor

Each Direct Participant or Aggregator has a Performance Factor for its portfolio enrolled under the Reservation Payment Option. When more than one Contingency Event, Immediate Event and/or Test Event is called during the month, the average of the Performance Factors of all events for a Direct Participant or Aggregator is the Performance Factor for that month. The Performance Factor for the month is used to calculate Reservation Payments for that month and each month thereafter until the month in which the next Load Relief Period or Test event is called by the Company during the current or subsequent year's Capability Period. The Performance Factor is rounded to two decimal places and has an upper limit of 1.00 and a lower limit of 0.00. If a Performance Factor is calculated to be less than or equal to 0.25, the Performance Factor will be set to 0.00.

If, during the prior Capability Period, an Aggregator did not participate in the program or if a Direct Participant either did not participate in the program or participated in the program through an Aggregator, the Performance Factor will be set to 0.5 in the current Capability Period and will remain at that level until the first month in which a Load Relief Period or Test Event is called. The Performance Factor determined for that month will be applied retroactively, starting with the enrollment month, to true-up the Reservation Payments for the prior month(s).

An existing Aggregator or Direct Participant's Performance Factor will carry forward to the start of the next Capability Period even if there is a change in the Aggregator or Direct Participant's portfolio, and will remain at that level until the first month in which a Load Relief Period or Test Event is called.
