REVISION: 1
SUPERSEDING REVISION: 0

SERVICE CLASSIFICATION NO. 2 (Continued)

7. Permanent Discontinuance

Upon not less than 90 days' prior written notice to Company, customer may request that any Facility be discontinued permanently. Company shall have the right to remove or retire-in-place the designated Facility(s). The customer is required to compensate the Company for the Facility(s) to be permanently discontinued. The compensation is specific to the Facility(s) to be permanently discontinued and is comprised of three individual financial components; asset valuation, removal cost and system reconfiguration costs as further defined below.

- a. Asset valuation shall be determined based upon the applicable tax area asset category average of the Facility(s) net book value, less any Facility(s) salvage value based upon the Company's plant records.
- b. Removal cost shall include, but not be limited to all; labor, material, transportation, administrative and general expenses, site restoration and other charges and adders applicable thereto. In the event permanently discontinued Company Facilities are replaced with other Company Facilities at the same time, the removal cost may be waived.
- c. System reconfiguration costs, if necessary, shall include, but not be limited to all; labor, material, transportation, administrative and general expenses and other charges and adders for the Company to perform any electric system reconfigurations required to maintain service to unaffected street light locations.
- d. Conversion or the in-situ replacement of Company-owned HID luminaire and lamp Facilities with Company-owned LED luminaire Facilities only will not require the customer to compensate the Company for any removal or system reconfiguration costs. Relocation, reorientation, rearrangement or any other actions associated with other assembly Facilities, as requested by the customer, during the performance of the luminaire conversion are to be administered in compliance with all applicable provisions of this Tariff.
