GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER R – Net Metering and Value Stack Tariff for Customer-Generators – Continued

B. Definitions, applicable to this Rider only – Continued

“Net injection” or “Net hourly injection” is the amount of excess energy produced by a Customer’s electric generating equipment beyond the Customer’s usage that is fed back to the Company’s system for a Customer served under the Value Stack Tariff.

“Remote Net Metering” or “RNM” refers to net energy metering in which excess energy produced by a Customer’s electric generating equipment is applied to that Customer’s other electric accounts pursuant to Section F of this Rider.

“Residential,” for purposes of this Rider, refers to service under SC 1, and “Non-residential” refers to service under any other Service Classification.

“Stand-alone Electric Energy Storage,” for the purposes of this Rider, includes regenerative braking, whether or not paired with a separate battery, and Vehicle to Grid (“V2G”) systems.

C. Applications for Service

1. Customers’ applications for interconnection to the Company’s system will be made using the applications set forth in Addendum-SIR.
2. Assuming the conditions of the Standardized Interconnection Requirements are met, the Company and the Customer will execute the New York State Standardized Contract set forth in Addendum-SIR.
3. Customers’ applications for service under this Rider for net metering or the Value Stack Tariff will be made using Application Form G in the General Rules. Applications for CDG will be made using the application form set forth in the Company’s CDG Program Procedural Requirements. CDG Hosts required to take Standby Service and/or SC 11 must also complete Application Form G in addition to the application form set forth in the Company’s CDG Program Procedural Requirements.
