Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 09/01/2021  
Issued in compliance with Order in Case 19-E-0735 dated 07/15/2021

Leaf: 17.9.3  
Revision: 0  
Superseding Revision:

## PASNY DELIVERY SERVICE

### General Provisions - Continued

#### Value Stack Tariff for PASNY Customer-Generators - Continued

##### Remote Crediting – Continued:

- (e) The RC Host Account may allocate to RC Satellite Accounts any portion of the RC Host Account's banked credits if written instructions are received by the Company 15 days before the RC Host Account is next billed. Any remaining available RC Host Account banked credits shall offset the RC Host Account's monthly electric charges. After offsetting the RC Host Account's electric charges, any remaining amount shall carry over on the RC Host Account's banked credits.
- (f) The total amount of credit allocated to an RC Satellite Account will be applied as a direct monetary credit, up to the RC Satellite Account's current electric utility bill for any outstanding energy, customer, demand, or other electric charges. Any remaining unused credit for that RC Satellite Account shall be carried over to the RC Satellite Account's next billing period pursuant to the Charges and Credits – Value Stack Tariff section in the Value Stack Tariff for PASNY Customer-Generators.
- (g) RC Satellite Accounts are not permitted to participate in RNM, CDG or act as an RC Host. RC Hosts are not permitted to participate as an RC Satellite in another RC project or as an RNM Satellite.
- (h) An RC Satellite Account may receive allocations from multiple RC Host Accounts and/or be a PASNY Customer-generator.
  - i. Such RC Satellite Accounts are limited to a cumulative total of 5 MW of installed capacity allocated to the RC Satellite Account as determined by adding the total installed on-site capacity to the allocated capacity from all RC projects in which the RC Satellite Account is a participant. The RC Host Account must certify in writing to the Company, both prior to commencing RC and annually thereafter, that it has met all program criteria set forth in the Commission's Orders, including, but not limited to, certifying that the cumulative total installed capacity of each of its RC Satellite Accounts does not exceed 5 MW. If it is determined that an RC Satellite Account is receiving more than the aggregated capacity of 5 MW, the Company shall suspend any allocation of credits to the RC Satellite Account and those credits will remain with the appropriate RC Host Account. The allocation to the RC Satellite Account will resume once the RC Satellite Account meets the 5 MW limitation.
  - ii. If such RC Satellite Account has onsite generation, the Company shall first add together the current month's credits from onsite generation and any prior period excess carryover credits from the RC Satellite Account's onsite generation. This total will then be applied as a direct monetary credit to the RC Satellite Account's current electric utility bill. The remaining electric bill, if any, shall be offset by allocations to the RC Satellite Account from its RC Host Account(s).
