ORANGE AND ROCKLAND UTILITIES, INC.
 INITIAL EFFECTIVE DATE: February 28, 2021

LEAF: 252
 REVISION: 9
 SUPERSEDING REVISION: 8

GENERAL INFORMATION

24. STANDBY SERVICE AND STANDBY SERVICE RATES (Continued)

24.2 INTERCONNECTION REQUIREMENTS (Continued)

- (2) The following provisions are applicable to customers with private generation facilities on their premises not connected directly to transmission facilities above 138 kV that (i) commenced operation prior to February 1, 2000; or (ii) commenced operation between February 1, 2000 and December 30, 2004 and either have a total nameplate rating between 301 kVA and 2 MW or between 401 kW and 2 MW in the case of Farm Waste Generators or are connected in parallel with a network system; or (iii) have a total nameplate rating greater than 2 MW and are connected in parallel with the distribution system:
- (a) Such facilities shall be subject to the interconnection standards set forth in the Company's "Operating, Metering, and Equipment Protection Requirements For Parallel Operation of Generating Facilities" appropriate for the nameplate rating of the customer's generator.
- Customers connecting to transmission facilities above 138 kV shall be subject to interconnection requirements imposed by the NYISO.
- (b) All requests for parallel operation will be reviewed on a case-by-case basis. Parallel operation will be permitted only if, and to the extent, such operation does not jeopardize the adequacy or reliability of service to the Company's other customers. Failure of the customer at any time to comply with the terms and conditions specified by the Company in order to permit parallel operation will result in the customer forfeiting its right to operate in parallel with the Company's system. In the event a customer forfeits its right to operate in parallel with the Company's system, the customer will be required to bear the reasonable expense associated with disconnecting the customer's private plant from the Company's system. Where there is a dispute between the customer and the Company with respect to the standards and charges for interconnection, the customer may apply to the Commission for a ruling in the matter.
 - (c) The customer is solely responsible for providing adequate protection for customer's facilities operating in parallel with the Company's system. Except where caused by the Company's negligence, the Company will not be liable for, and the customer shall indemnify and hold the Company harmless, for damages to the property of the Company or others or injuries to persons arising out of any occurrence related to the customer's ownership, use or operation of the customer's facilities.
