ORANGE AND ROCKLAND UTILITIES, INC.
 INITIAL EFFECTIVE DATE: February 28, 2021

LEAF: 151
 REVISION: 4
 SUPERSEDING REVISION: 3

GENERAL INFORMATION

13. SERVICE CLASSIFICATION RIDERS (Continued)

RIDER C

Applicable to any demand-billed customer who is qualified to take service under Service Classification Nos. 2, 3, 9, 20, 21, and 22. Customers who qualify for tax credits pursuant to the Excelsior Jobs Program ("EJP") Act (L. 2011, c. 61) may receive EJP discounts as described hereunder.

DEFINITIONS

Baseline Billing Determinants shall be established for an Existing Customer and shall be determined based on the twelve monthly billing periods immediately preceding the Company's receipt of the customer's Initial Certification. Baseline Billing Determinants are based on: (a) the billable demand and usage for customers served under the Standard Rates of Service Classification Nos. 2 and 3; (b) the billable demand and usage for customers served under the Standard Rates of Service Classification Nos. 9, 20, 21, and 22, for each specified time period, as applicable; and (c) the contract demand for customers served under an applicable Standby Service Rate. The Company may estimate or adjust the Baseline Billing Determinants if sufficient billing information does not exist, or if the Company determines the billing history is not representative of usage and demand characteristics of the customer. The Baseline Billing Determinants that are established per month will remain fixed for the entire EJP term.

Incremental Billing Determinants shall mean: (a) an Existing Customer's monthly billable demand and usage in excess of the applicable Baseline Billing Determinants; (b) a New Customer's monthly billable demand and usage; (c) the incremental contract demand and incremental as-used daily demand for an existing customer billed under a Standby Service Rate; or (d) the contract demand and as-used daily demand for a new customer billed under a Standby Service Rate. For an existing customer billed under Standby Service Rates, the incremental contract demand will be determined based upon the difference between the new contract demand and the baseline contract demand. The incremental as-used daily demand will be determined by applying the ratio of the incremental contract demand to the total contract demand (after increased EJP load) and applying the ratio to the as-used daily demand. The Incremental Billing Determinants will be the basis for the delivery demand and usage subject to the EJP discounts under this Rider.
