## GENERAL INFORMATION

### 13. SERVICE CLASSIFICATION RIDERS (Continued)

#### RIDER D

#### DIRECT LOAD CONTROL PROGRAM

#### APPLICABILITY

Any customer who is qualified to take service under Service Classification Nos. 1, 2, 3, 9, 19, 20, 21, or 22.

#### DEFINITIONS

Control Device is a device installed on the customer's load controllable equipment via a smart plug or embedded control that allows the Company to remotely control the equipment when an Event is called. For purposes of this Rider, Control Device means one or more devices as may be required to control the equipment. Each Control Device contains a feature that allows the customer to override the Company's control of the customer's equipment. The Control Device must be provided, installed, and connected to the internet by the Company, or it must be installed and connected to the internet by a customer who enrolled in the program through a Service Provider.

Event may be declared by the Company when: (a) the NYISO declares an emergency in conjunction with an in-day peak hour forecast response to an operating reserve peak forecast shortage, or in response to a major state of emergency as defined in Section 3.2 of the NYISO Emergency Operations Manual, or at the NYISO's discretion to relieve system or zonal emergencies; (b) the Company's distribution control center declares an emergency, or a voltage reduction of five percent or greater has been ordered; or (c) the Company determines that a system-wide peak or designated area peak may occur.

Service Provider means a provider registered with the Company to develop, maintain, and operate a communications portal that enables internet-connected Control Devices to participate under this Rider. A list of current Service Providers is available on the Company's website.

Test Event is called under this Rider to test participant responses to the signal sent to a Control Device. A Test Event may last up to four hours.

#### ELIGIBILITY

To participate under this Rider, a customer must have load controllable equipment and agree to the installation of a Control Device.
