## GENERAL INFORMATION

### 8. LIMITATIONS OF SERVICE CLASSIFICATIONS (Continued)

#### 8.3 STANDBY AND BUY-BACK SERVICES

Except as noted in the following paragraphs, the rates and charges set forth in all service classifications except Service Classification No. 15 and Standby Service Rates in this Schedule are applicable only where the Company's service is to be used as the customer's firm delivery service. The Company's delivery service shall not be used as backup or supplemental to any other generating equipment, nor shall any other generating equipment be operated in parallel or synchronism with the Company's service, except as specifically authorized by the Company. A customer having another installed source of energy may, however, segregate any portion of customer's total requirements so that such portion shall be served exclusively with the Company's service.

A customer with a private generating facility on its premises that (1) desires Standby Service or (2) desires to operate in parallel with the Company's electrical system must take service under the applicable Standby Service provisions and Standby Service Rates of this Rate Schedule, except for customers identified as not being subject to Standby Service Rates. The customer shall notify the Company of all changes in customer's generating facilities prior to making such changes and shall allow the Company's representatives access to those facilities at all reasonable times, for the purpose of inspection and/or re-determination of the contract demand.
