

PSC NO: 220 ELECTRICITY  
NIAGARA MOHAWK POWER CORPORATION  
INITIAL EFFECTIVE DATE: APRIL 1, 2021  
STAMPS: Issued in Compliance with Order in Case 15-E-0082, dated February 12, 2021.

LEAF: 149  
REVISION: 12  
SUPERSEDING REVISION: 11

## GENERAL INFORMATION

### COMMUNITY DISTRIBUTED GENERATION ("CDG") (Continued)

#### 29.2 Requirements of CDG Hosts

29.2.1 The CDG Host, by submitting the completed allocation request form to the Company, certifies that it has written authorization from the customer to request and receive the customer's historic usage and that it has entered into a written contract with the Customer. The CDG Host will be responsible for providing the Company with the CDG Satellites' names, addresses, account numbers, proportionate share of excess generation credits and any other such information required by the Company 60 days before credits are to be distributed to the CDG Satellite. The Company will not be responsible or held liable for any contractual arrangements or other agreements between the CDG Host and CDG Satellite, including terms, pricing, dispute resolution or contract termination.

29.2.2 The CDG Host must certify in writing to the Company, both prior to commencing CDG service and annually thereafter that it meets the creditworthiness standards and requirements established by the PSC to be a CDG Host.

29.2.3 The CDG Host must not have less than ten associated CDG Satellites, except for the limited waivers set forth below in Rule 29.2.3.1 and Rule 29.2.3.2. Each associated CDG Satellite must take a percentage of the CDG Host's excess generation, except with the limited waiver in Rule 29.2.3.2. The percentage must equal at least 1,000 kWh annually but must not exceed the CDG Satellite account's historic average annual kWh or a forecasted average annual kWh if actual data is not available. Additionally, the CDG Host must allocate the project's generation to its CDG Satellites according to the following:

29.2.3.1. A CDG Host that has paid 25% of the Company's estimated interconnection costs, or executed the New York State Standardized Interconnection Contract if no such payment is required, on or before February 12, 2021, and thereafter interconnects to the Company's distribution system, in accordance with the SIR, but has not yet begun allocating credits to CDG Satellites, must allocate at least 60% of the project generation to CDG Satellites that are:

29.2.3.1.1 Served under SC-1, SC1-C, or SC-2 Non-Demand; or

29.2.3.1.2 Served under SC-2 Demand, SC-3, SC-3A, SC-4, or SC-12, in accordance with their SC-12 contract, and where the CDG Satellite has a) an average billed kW less than or equal to 25 kW based on the most recent 12 monthly billing periods, or b) a percentage allocated from the CDG Host that does not exceed 25 kW when multiplied by the AC nameplate rating of the generating facility, as reported to the Company during the interconnection process or any subsequent upgrades; or

29.2.3.1.3 A multi-unit building with a single meter serving multiple occupants, as described in Rule 29.2.4.

29.2.3.2. A CDG Host whose project has interconnected to the Company's distribution system, in accordance with the SIR, on or before February 12, 2021 and has allocated credits to CDG Satellites, must continue to use the allocation methodology accepted and approved by the Company in its initial allocation form submission for that project.
