

Effective Date: 04/27/2017

PSC No: 19 - Electricity  
Rochester Gas and Electric Corporation  
Initial Effective Date: April 27, 2017  
Issued in compliance with Order in Case Nos. 15-E-0751 and 15-E-0082, dated March 9, 2017.

Leaf No. 160.39.2.1  
Revision: 4  
Superseding Revision: 3

## GENERAL INFORMATION

### 15. Solar Non-Residential Electric Service Option (Cont'd)

#### F. Billing

For each billing period during the term of the SIR Contract - the Company shall net the electricity (kWh) delivered to the customers with electricity (kWh) supplied by the customer to the Company.

##### 1. Non-Hourly Pricing

- a. If the electricity (kWh) supplied by the Company exceeds the electricity supplied by the customer to the Company during the billing period, the customer shall be billed for the net kWh supplied by the Company to the customer at the standard service class rates. For customers billed on time-differentiated rates (TOU meter), e.g., On-Peak/Off-Peak, netting shall occur in each time period.
- b. If the electricity (kWh) supplied by the customer to the Company during the billing period exceeds the electricity (kWh) supplied by the Company to the customer, a kWh credit shall be carried forward for the next billing period. For customers billed on time-differentiated rates (TOU meter), e.g., On-Peak/Off-Peak, the credit shall be carried forward as a credit to the appropriate time period.
- c. For a demand-billed customer, prior to carrying forward any kWh credit, the kWh shall be converted to a dollar value using the applicable tariff per kWh rate and applied as a credit to the current utility bill. If the dollar value of the kWh exceeds the current utility bill, any remaining dollars shall be converted back to kWh and carried forward for the next billing period as a kWh credit.
- d. For customer billed on TOU rates, if the electricity (kWh) supplied by the customer is not metered for each TOU period and until such time as metering is installed to measure electricity supplied to the Company in each TOU period, an allocation of the electricity supplied to the Company shall be done according to the allocation factors set forth in a Special Provision provided in each service classification in this Schedule.

##### 2. Hourly Pricing

- a. For customers billed on Hourly Pricing, for each hour, the customer's usage and its generation are netted within the hour.
- b. Kilowatt-hour charges are calculated using the consumption in each hour in which the customer's usage exceeds the customer's generation multiplied by the applicable charge.
- c. For each hour the electricity generated and supplied by the customer exceeds the customer's usage, the kWh difference is multiplied by the applicable tariff per kWh rates (e.g., Energy Charge, Supply Charge, Merchant Function Charge, Supply Adjustment Charge, Ancillary & NTAC, transmission project costs allocated to the Company under the NYISO tariff as approved by FERC, SBC, TSAS, and RDM). This is the current month's excess monetary credit.
- d. The excess monetary credit from the current and/or prior bill period(s) is applied to the current bill. If the excess monetary credit exceeds the current bill, the monetary credit is carried forward to the next billing period.
