**GENERAL INFORMATION****13. SERVICE CLASSIFICATION RIDERS (Continued)****RIDER N (Continued)****NET METERING FOR CUSTOMER GENERATORS****APPLICABILITY (Continued)**

- (F) For a residential customer, qualifying wind electric generating equipment located and used at the customer's primary residence with a rated capacity of not more than 25 kW.
- (G) For a residential customer, micro-combined heat and power ("Micro-CHP") generating equipment with a rated capacity of at least 1 kW and not more than 10 kW. Prior to commencing service under this Rider, a customer with Micro-CHP generating equipment must submit technical documentation, acceptable to the Company, establishing that the equipment meets the requirements specified in Public Service Law Section 66-j and in the SIR. No more than once annually thereafter, the Company may require the customer to submit technical documentation in order to establish continued eligibility. A customer who fails to provide documentation acceptable to the Company within 30 days of a Company request will be deemed ineligible to take service under this Rider until the first billing cycle commencing after acceptable documentation is provided.
- (H) For a residential customer, fuel cell generating equipment with a rated capacity of not more than 10 kW.
- (I) For a residential customer (other than a farm utilizing a residential meter), qualifying solar electric generating equipment with rated capacity of not more than 25 kW, unless the residence is also the location of the customer's farm operation as defined in Subdivision 11 of Section 301 of the Agricultural and Markets Law, in which case the equipment may have a rated capacity of not more than 100 kW.

For purposes of this Rider: (1) the term "Large On-Site Customer" means a customer who is billed under demand rates whose electric generating equipment supplies energy to a single account behind the same meter as the generating equipment; and (2) the term "Mass Market Customer" means a customer billed under energy-only rates whose electric generating equipment supplies energy to a single account behind the same meter as the generating equipment.
