

P.S.C. NO. 3 ELECTRICITY**ORANGE AND ROCKLAND UTILITIES, INC.**

INITIAL EFFECTIVE DATE: June 1, 2018

SUPERSEDING REVISION:

LEAF: 181

REVISION: 10

9

Issued in compliance with Order in Cases 15-E-0751 and 15-E-0082 dated 4/20/2018.

GENERAL INFORMATION**13. SERVICE CLASSIFICATION RIDERS (Continued)****RIDER N (Continued)****NET METERING AND VALUE STACK TARIFF FOR CUSTOMER-GENERATORS****REMOTE NET METERING AND COMMUNITY DISTRIBUTED GENERATION (Continued)****(B) Community Distributed Generation**

Through April 30, 2016, Community Distributed Generation ("CDG") is available where: (a) the generating equipment is located within a CDG Opportunity Zone shown on the Company's website; or (b) a minimum of 20 percent of the CDG Satellites are residential customers enrolled in the Company's low-income program. Thereafter, CDG will be available throughout the service territory.

A "CDG Host" is defined as a non-residential customer that owns or operates electric generating equipment eligible for net metering or the Value Stack Tariff under this Rider and whose net energy produced by its generating equipment is applied to the accounts of other electric customers ("CDG Satellites") with which it has a contractual arrangement related to the disposition of net metering credits.

(1) Application by CDG Hosts

The CDG Host shall designate in its initial application for CDG service the CDG Host Account and its associated CDG Satellite. The CDG Host must designate no fewer than ten CDG Satellite Accounts unless: (1) all of the CDG Satellite Accounts are located on the site of the same property as the CDG Host serving residential and/or non-residential customers; or (2) the CDG project only serves CDG Satellite Accounts that are a farm operation as defined in Subdivision 11 of Section 301 of the Agricultural and Markets Law and residences of individuals who own or are employed by the served farm operation ("Farm Operation CDG Projects"). For all but Farm Operation CDG Projects, no more than 40 percent of the output of the CDG Host may serve CDG Satellites of 25 kW or greater; provided, however, that the CDG Host may treat each dwelling unit served indirectly in a multi-unit residential building as though it were a separate participant for determining whether the ten-CDG Satellite Account minimum and 40 percent output limit are reached. Each CDG Satellite Account must take a percentage of the output of the CDG Host's excess generation. The percentage must amount to at least 1,000 kWh annually but may not exceed the CDG Satellite Account's historic average annual kWh usage (or forecast usage if historic data is not available). The CDG Host, by submitting a completed application to the Company, is certifying that its project meets the PSC's eligibility requirements specified in its Order issued July 17, 2015, in Case 15-E-0082 and in its Order issued April 20, 2018, in Cases 15-E-0751 and 15-E-0082, and as may be revised thereafter.
