SERVICE CLASSIFICATION NO. 10

**NON-RESIDENTIAL DISTRIBUTED GENERATION
FIRM SALES SERVICE**

APPLICABLE TO THE USE OF SERVICE FOR:

Firm Sales Service to any new or existing gas fueled distributed generation (DG) facility that represents generating units designed to provide electricity to a single customer or specific customers within a defined geographical location with generating capacity of less than 50 Megawatts (MW) that maintains a load factor of 50% or more. (Load factor is defined herein as annual usage divided by the (peak winter day demand x 365 days).) Such distributed generation facilities may include, but not be limited to, reciprocating engines, steam turbines, gas turbines and emerging gas technologies such as fuel cells and microturbines. Service under this service classification is available throughout the Company's service territory to which this Schedule applies, providing the Company has facilities available and adequate for the load.

CHARACTER OF SERVICE:

Continuous - natural gas with a Btu content of not less than 950 Btu per cubic foot for all areas. Normal pressure 7" but not less than 4" water column. At the option of the Company, gas will be supplied at high pressure, where such service is available.

Gas service provided hereunder shall be daily metered and billed separately from gas service provided under any other service classification of the Company, and the use of gas measured by this separate meter for other than the above-described use is expressly prohibited.
