SUPERSEDING REVISION: 3

SERVICE CLASSIFICATION NO. 8 (CONT'D)
Individual Service Agreements

FINANCIAL ARRANGEMENTS –

At the sole discretion of the MED, the MED may waive certain costs due to it, in whole or in part, or make other necessary financial arrangements with customers served under this Rider, so long as the MED believes that the revenue derived from the applicant will provide sufficient revenue over and above the incremental cost incurred by the MED. These costs include, but are not limited to the following:

- (A) Special installation to meet their particular requirements for service at other than standard voltage or frequency and for the supply of closer voltage regulation than is required by standard practice. (See Section C, Tariff Leaf No.: 27)
- (B) Surety Bonds

TERM –

The term of each Individual Service Agreement will not exceed five years.

All customers receiving service under this service classification will not be charged the PPAC (purchase power adjustment), for those receiving service under “Eligibility (A) NYPA Economic Development Program”.

For those customers receiving service under “Eligibility (B) High Density Load Customer Program” and MED is supplying the customer, the NYMPA Generic Tariff Rider A will apply. For customers purchasing power from the New York Independent System Operator or another source, the ISA will include charges for a pass-through of all appropriate supply-related costs to protect other MED customers. An ISA will be utilized under this SC-8 tariff.

For all contracts entered under this service classification, MED will request trade secret protection so rates and terms are not available to the general public.
