Leaf: 384
Revision: 9
Superseding Revision: 8

GENERAL RULES

Application Forms – Continued

Form G – Application for Rider R or Standby Service and/or Buy-Back Service- Continued

Section 5. If you request Standby Service
--

A. Billing

Standby Service rates are Rates III and IV of SC 5, Rates IV and V of SC 8, 9, and 12 (demand), and Rate II of SC 13.

The following Customers who take Standby Service will be billed under Standard rates. Check below, if applicable:

- ☐ The generating equipment has a nameplate rating equal to no more than 15% of the maximum potential demand from all sources.
- ☐ The account would otherwise be billed under a non-demand-metered SC (SC 1, SC 2, or SC 12 energy only).

The following Customers who take Standby Service can be exempt from billing under Standby Service rates to the extent described in General Rule 20.3, unless they specifically request to be billed under Standby Service rates. Check below, as applicable (check only one below):

- ☐ The contract demand is less than 50 kW.
- ☐ Generation by a designated technology (Fill out “B” below) that will commence operation no later than May 31, 2019 will be billed under Standard rates by default.
- ☐ I request a targeted exemption (Fill out “C” below) for efficient CHP at a new or expanding CHP facility or for new battery storage and will commence such operation no later than December 31, 2021.
- ☐ I request that my account be billed under Standby Service rates and do not want any exemption from Standby Service rates. (Note: If you do not check off this box and either have a contract demand less than 50kW, are using a Designated Technology, and/or requesting targeted exemption, you will be billed under standard SC 5, 8, 9, 12, or 13 rates.)

B. Designated Technology or Technologies Exemptions

If you request an exemption from Standby Service rates pursuant to General Rule 20.3.2, because the generation exclusively uses one or more of the following technologies or fuels, please check off the box or boxes that apply:

- ☐ Wind ☐ Solar Thermal ☐ Photovoltaic ☐ Electric Energy Storage up to 1 MW
- ☐ Sustainably-Managed Biomass ☐ Fuel Cell ☐ Tidal ☐ Geothermal ☐ Methane Waste
- ☐ Efficient CHP of 15 MW or less meeting the requirements described in Section 7

C. Targeted Exemptions

If you request exemption from Standby Service rates pursuant to General Rule 20.3.3, please check off the box that applies: ☐ Efficient CHP of 1 MW or greater meeting the requirements described in Section 7A

- ☐ Battery Storage of 50 kW or greater
