## RDM (further Con't)

- a. For each service classification or sub classification subject to the RDM, each month, the Company will compare the Actual Billed Delivery Service Revenue and the Delivery Service Revenue Target. If the monthly Actual Billed Delivery Service Revenue exceeds the Delivery Service Revenue Target, the delivery service revenue excess will be accrued for refund to customers at the end of the Rate Year. Likewise, if the monthly Actual Billed Delivery Service Revenue is less than the Delivery Service Revenue Target, the delivery revenue shortfall will be accrued for recovery from customers at the end of the Rate Year.
  
- b. At the end of the Rate Year, total delivery service revenues will be compared to cumulative monthly target revenues for each service classification or sub classification. Any variance from cumulative target revenues will be either refunded or surcharged to customers over the twelve monthly periods of the immediately succeeding Rate Year. Any surcharge or credit amount will reflect interest at the then effective other customer deposit rate and will be either recovered or returned on a service classification or sub classification basis
