GENERAL INFORMATION - Continued

VI. Service Classification Riders (Available on Request) - Continued

RIDER H

Applicable to Service Classification Nos. 2 and 9
(Subject to the provisions thereof)

Distributed Generation Rate

(H) Special Provisions - Continued

- (5) Customers with separately metered distributed generation facilities at the same Specified Location whose nameplate rating, in aggregate, is at least 5 MegaWatts, but whose nameplate rating for each distributed generation facility at the same Specified Location is at least 1 MegaWatt but less than 50 MegaWatts, may, at the Customer's request, be billed under the rates applicable to Rate II as long as the following conditions are met:

- (a) The Rider H accounts at a single Specified Location must be all established in a single Customer's name.
- (b) Each Rider H account must be separately metered.

Each separately metered distributed generation facility, aggregated under this provision for the purpose of qualifying to be billed under Rate II of this Rider, is subject to the metering and communications requirements as specified in Special Provision (H)(1) and will be considered a separate account for billing purposes and all other provisions of this Rider including, but not limited to, the application of the annual load factor test, the determination of the contract demand and the calculation of the minimum charge.

The contract demand for each separately metered account will be determined based on the highest one hour gas usage for that individual account, in accordance with Section (D) of this Rider.
