VI. Service Classification Riders (Available on Request) - Continued

RIDER H

Applicable to Service Classification Nos. 2 and 9
 (Subject to the provisions thereof)

Distributed Generation Rate

(A) Applicability:

To non-residential Customers eligible to receive service under Service Classification ("SC") No. 2 and SC No. 9 Rates A(2) and A(4) where the separately metered gas service is used solely for the purpose of the operation of a Distributed Generation Facility with a nameplate rating less than 50 MegaWatts and having an Annual Load Factor equal to or greater than 50 percent. Where multiple units are installed at a single specified location, the total nameplate rating of all units billed under a single account shall govern the rates that will apply, except as provided for in Special Provision (H)(5).

(B) Definitions:

For the purposes of this Rider, the following definitions shall apply:

- (i) **Annual Load Factor** is defined as the Customer's annual gas usage divided by the product of the Customer's Winter Peak Day Gas Usage and the number of days in the annual determination period.

The formula to calculate Annual Load Factor is:

$$\text{Annual Load Factor} = \frac{\text{Total Annual Gas Usage}}{\text{Winter Peak Day Usage} \times \text{No. of days in the annual determination period}}$$

- (ii) **Distributed Generation** represents generating units designed to provide electricity to a single Customer or specific Customers within a Specified Location.
- (iii) **Distributed Generation Facility** is defined as one or more on-site Distributed Generation units (including combined heat and power applications) billed under a single account.
- (iv) **Specified Location** is defined as a single building; or several buildings within a single parcel of land not intersected by a public highway or a city street, under ownership of a single customer and having the same customer name on all accounts.
