

PSC No: 19 - Electricity
Rochester Gas and Electric Corporation
Initial Effective Date: July 1, 2015
Issued in Compliance with Order in Case 14-E-0423 dated December 15, 2014

Leaf No. 86.17
Revision: 0
Superseding Revision:

GENERAL INFORMATION

4. METERING AND BILLING (Cont'd)

S. Commercial System Relief Program (Cont'd)

5. Notification by the Company and Required Response (Cont'd)

- b. If the Company designates a Planned Event or a Test Event, the Company shall provide advance notice at least 21 hours in advance of the event. The Company shall again provide advance notice on the day of the event, usually two or more hours in advance.
- c. If the Company designates an Unplanned Event, notice shall be given as soon as practicable. Participants are requested to provide Load Relief as soon as they are able.
- d. Participants in the Reservation Payment Option are required to participate during:
 - i. all Contracted Hours for all Planned Events called by the Company during the Capability Period, and
 - ii. Test Events called by the Company. The Test Event period shall not exceed one hour.Participants in the Voluntary Participation Option shall not be tested.

6. Metering

- a. Participation under this Program requires that each participant's entire service be measured by billing quality interval metering with telecommunications capability. If an Aggregator takes service under this Program, all customers of the Aggregator must meet the metering and telecommunications requirements specified hereunder.
- b. If, at the time of application for service under this Program, the Company does not bill the participant monthly using interval metering, the Customer shall arrange for the furnishing and installation of interval metering with telecommunications capability to be used for billing and arrange for telecommunications service, at the participant's expense.
- c. Participation under this Program shall commence the first day of the first Capability Period month that occurs after the Company's acceptance of a completed application and at least 30 days after both the interval metering and communications become operational.
- d. The Company shall install interval metering within 21 business days of the later of the Company's receipt of an applicant's payment for an upgrade to interval metering and: (i) evidence that a request has been made to the telephone carrier (e.g., receipt of a job number) to secure a dedicated phone line for a meter with landline telecommunications capability or (ii) the active Internet Protocol ("IP") address that the wireless carrier has assigned to the modem's ESN for a meter with wireless capability. If the Company misses the installation time frame for the Reservation Payment Option, it shall make a "Lost Reservation Payment" to the Direct Participant or Aggregator, unless the meter delay was caused by a reason outside the Company's control, such as the telephone company's failure to install a landline or, if, at the Company's request, the Commission grants the Company an exception due to a condition such as a major outage or storm. A Lost Reservation Payment shall be calculated by determining the number of months between the earliest month in which the customer could have begun participation had the meter been installed within the required timeframe (assuming the Company's acceptance of a completed application and receipt of payment for the meter upgrade) and the first month following the completed installation, and multiplying that number by the pledged kW and associated per kW Reservation Payment Rate.
