PSC No: 120 - Electricity
New York State Electric & Gas Corporation
Initial Effective Date: December 1, 2016
Issued in compliance with Order in Case 14-M-0101, dated May 19, 2016.

Leaf No. 294.13
Revision: 0
Superseding Revision:

SERVICE CLASSIFICATION NO. 11 (Continued)

(g) Standby Offset

A customer with qualifying on-site generation connected to the Company's distribution system may use its excess generation to supply two or more Standby Supplied Accounts as long as all of the requirements in this provision are met.

Definitions

Standby Generation Account: The customer meter where the generating equipment is located and interconnected with the Company's distribution system.

Standby Supplied Accounts: Additional meters billed under this standby service class designated by the Standby Generation Account for the application of excess generation that meet the Standby Supplied Account requirements listed below.

Eligibility

1. Standby Generation Account
 - a. The Standby Generation Account's generating facility must (i) have a total nameplate rating of over 2 MW but no more than 20 MW; and (ii) meet eligibility criteria for designation as efficient "combined heat and power" pursuant to the order of the Public Service Commission, dated January 23, 2004, in Case 02-E-0779, except with respect to maximum generating capacity. The generating facility may have more than one generating unit so long as the aggregate nameplate rating conforms to (i) above
 - b. The Standby Generation Account must have interval metering and meet the interval metering and telecommunication requirements of this service class before they will be eligible for the offset provision. The meter and telecommunications for the account associated with the Standby Generation Account's excess generation must be provided and maintained at the customer's expense, and must be operational before the customer may take service under this provision.
 - c. All interconnection requirements of this service class must be met before an account will be eligible for the offset provision. In addition, the interconnection must be technically and economically practicable, and the connection and operation of such facility shall not jeopardize the safety or operation of the Company's system, facilities, or other customers.
 - d. Accounts that are eligible for net metering, remote net metering, community net meter, standby exemption, NYPA allocations including RNY, or economic development rates are not eligible for this offset provision.
 - e. Each Standby Generation Account will be billed with the applicable standby service rates in this service class.
 - f. Each Standby Generation Account is eligible for the supply options as described in this service class.
