

PSC NO: 12 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 07/21/2016

Leaf: 17.1.1  
Revision: 0  
Superseding Revision:

## PASNY DELIVERY SERVICE

### General Provisions - Continued

#### Standby Service - Continued

General Rule 20.2.1(B)(8) is amended as follows - Continued:

“Allocated Generator Supply” referenced in General Rule 20.2.1(B)(8)(e), is not applicable to service under this Rate Schedule. The Company will not provide kilowatthour credits for the generator’s output.

“Percentage Allocation” in General Rule 20.2.1(B)(8)(e)(1) means the percentage of the generating facility’s output that PASNY has allocated to each Recipient Account under the Multi-party Offset. The Percentage Allocations, which will be applied to Allocated As-used Generator Demand, must total 100 percent, of which PASNY must establish: (a) a Percentage Allocation of 10 percent or more to a single Recipient Account of the PASNY Customer that is the Sponsor; and (b) a Percentage Allocation of no less than 5 percent or more than 90 percent to each additional Recipient Account. The Recipient Accounts and the Percentage Allocation to each must be assigned in writing by PASNY, using the PASNY Multi-Party Offset Percentage Allocation Form, at least 30 days before commencing service under the Multi-party Offset. PASNY may change the Percentage Allocations and the Recipient Accounts as described on the Form. No credits will be applied if the Sponsor ceases to have a Recipient Account or ceases to own or operate the generating facility. If a Recipient Account is closed, its credits will be forfeited unless the Company receives a new Form within 30 days of the account’s closure.

The following text replaces General Rule 20.2.1(B)(8)(e)(2): Each account supplied by the generating facility’s output will be billed under Standby Service rates, as modified below: (i) There will be an additional Customer Charge of \$50.00 per account per billing period, exclusive of the Increase in Rate and Charges. (ii) For each 15-minute interval, the maximum demand registered on the account's meter(s) will be reduced by the Allocated Generator Demand for purposes of determining the daily maximum demand that is used for billing As-used Daily Delivery Service Demand Charges. PASNY will receive a Monthly Communications Service Credit as specified under the “Metering Credits” section of this Rate Schedule.

In General Rule 20.2.1(B)(8)(f), the applicable Reactive Power Demand Charges are those specified under the Common Charges of this Rate Schedule.

If a PASNY Customer that is a Qualifying Facility takes Standby Service under this Rate Schedule and under SC 11 of the Schedule for Electricity through the same service connection: (i) the Customer Charge will be waived under SC 11; and (ii) the contract demand charges under SC 11 shall apply only to the contract demand in excess of either the contract demand billed under Rate III or Rate IV or the as-used demand billed under Rate I or Rate II of this Rate Schedule. If the PASNY Customer is served under General Rule 20.2.1(B)(7) or General Rule 20.2.1(B)(8), the Payment for Energy under SC 11 is applicable to energy generated by the private generating facility in excess of the total kilowatthours registered on the PASNY Standby Service account(s) supplied by the generating facility’s output, adjusted for transformation losses as applicable.
