      9.   Special Provision (Cont'd)
         A. Remote Net Metering (Cont'd)

IV.   Calculation and Application of Net Metering Credits (Cont'd)

    b.   Application of Monetary Credits - Demand Billed or a Facility Located and Used at Farm Operation

Host Account:
In a month where the Host Account has Excess Generation, the Excess Generation shall be converted to the equivalent monetary value at the per kWh rate applicable to the Host Account's service classification. The remote net metering credit shall first be applied to any outstanding charges on the Host Account's current electric bill.

For Non-hourly Pricing customers, remote net metering credits shall be defined as the Excess Generation multiplied by the Host Account's applicable tariff per kWh rates.   For Hourly Pricing customers, as defined under Billing for Hourly Pricing customers, remote net metering credits shall be defined as the excess monetary credit.

Satellite Accounts:
The remote net metering credit shall first be applied to any outstanding charges on the Host Account's current electric bill. Any remaining monetary credit shall be allocated between the Host Account and the Satellite Accounts. The portion designated for the Satellite Accounts shall be applied to the Satellite Account bills as each subsequent Satellite Account bill is calculated. In the case of two Satellite Accounts billed on the same day, the credit shall be applied to the highest usage account first.

The credit applied to each Host or Satellite Account shall not exceed the current electric delivery charges, and if applicable, Company supply charges. If a monetary credit remains after applying credits to all designated Satellite Accounts, the credit shall be carried forward on the Host Account and the allocation process between Host and Satellite Accounts shall repeat until the value of the excess credit is zero, or until all associated accounts are finaled.
