GENERAL INFORMATION

Whenever more than one Customer shall be connected to said extension, each such additional Customer shall execute an agreement with the Company to pay his proportional share of the surcharge and said surcharge shall be so adjusted as to yield to the Company not more than said twelve per cent (12%) in any one year from all Customers served from said extension and said surcharge will be reasonably allocated to the several Customers served from said extension, taking into account that seventy-five (75) feet of main and a service are to be allowed without surcharge for each Customer and twenty (20) feet of main allowed without surcharge for each hydrant connected thereto.

Whenever the number of Customers on said main extension multiplied by seventy-five (75) feet plus the number of hydrants on the said extension multiplied by twenty (20) feet shall equal or exceed the length of the said main extension, or whenever the total revenue in one year from all Customers on the said main extension shall exceed one-fourth (1/4th) of the actual reasonable cost of said main extension if the size of the said extension be six (6) inches or less in nominal diameter or the estimated cost of six (6) inch main if the Company lays a main greater than six (6) inches in diameter, all surcharges shall cease; and no surcharge shall be imposed if the total estimated revenue in one year shall exceed one-fourth (1/4th) of said cost as defined in this paragraph.

The undersigned agrees that before this application is accepted or approved by the Company he will first furnish the Company reasonable security as to performance of his agreement.
