

PSC No: 120 - Electricity
New York State Electric and Gas Corporation
Initial Effective Date: February 1, 2014
Issued in compliance with Order in Case 13-E-0423 dated September 18, 2013
GENERAL INFORMATION

Leaf No. 117.39
Revision: 5
Superseding Revision: 4

30. Fuel Cell Electric Service Option (cont'd.)

B. Non-Residential Electric Service Option (cont'd)

Upon the Company's determination that the customer has taken service under this Section while in violation of the conditions of service set forth herein, the customer shall forfeit any positive balance accrued during the annual period in which the violation occurred.

Costs

Pursuant to the Standard Interconnection Requirements set forth within Addendum-SIR of PSC No.119, customers are responsible for providing all meter boxes and sockets. In the event that the Company determines that it is necessary to install a dedicated transformer or transformers, or other equipment to protect the safety and adequacy of electric service provided to other customers, a customer generator shall pay for the cost of installing the transformer(s), or other equipment. Customers are responsible for any costs related to the installation of their fuel cell generating equipment. Notwithstanding the provisions herein, non-residential fuel cell electric customers are responsible for meeting all otherwise applicable provisions and requirements of PSC. Nos. 119 and 120.

4. Remote Net Metering

a. Definitions

Host Account: The customer meter where the fuel cell generating equipment is located and interconnected with the Company's distribution system.

Satellite Accounts: Additional meters designated by the Host Account, with the same name on the account, for the application of excess net metering credits.

Excess Generation: the electricity (kWh) supplied by the customer to the Company during the billing period exceeds the electricity (kWh) supplied by the Company to the customer.

b. Customer Requirements and Eligibility

A customer participating in Fuel Cell Non-Residential Electric Service Option may designate all or a portion of the excess credit, after application to the Host Account, to Satellite Accounts at any property owned or leased by such customer within the same load zone as determined by the Locational Based Market Price. This will be completed on a form when submitting their initial remote net metering application.

Satellite Accounts must be held by the same customer and have an identical billing name, on property owned or leased by such customer. The utility reserves the right to investigate/obtain proof that all designated accounts are held by the customer. Satellite Accounts cannot also participate as a net metering customer-generator. Satellite Accounts can only have one Host Account.
