

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 07/16/2014
Issued in compliance with order in Case 13-E-0573 dated 06/27/2014

Leaf: 257
Revision: 5
Superseding Revision: 4

GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER S – COMMERCIAL SYSTEM RELIEF PROGRAM - Continued

D. Applications and Term of Service

1. Applications for service under this Rider must be made electronically. Direct Participants and Aggregators may participate after the Company's receipt and approval of a completed application. The Company will accept applications by April 1 for a May 1 commencement date, and by May 1, for a June 1 commencement date. For the 2014 Capability Period only, the Company will also accept applications by June 1 for a July 1 commencement date and by August 1 for a September 1 commencement date. The desired commencement month must be specified in the application. All customers in a specific ANR must commence participation in the same month.

Applications will not be accepted after the specified date for participation during the current Capability Period. Where the first of the month falls on a weekend or holiday, applications will be accepted until the first business day after.

2. A Direct Participant or Aggregator may apply in writing to change the CBL Verification Methodology, to change the kW of pledged Load Relief, or to terminate service under this Rider for the upcoming Capability Period provided the request is received prior to commencing participation for that Capability Period. In order for a Direct Participant or Aggregator to increase its kW of contracted Load Relief for a network, the Direct Participant's or Aggregator's most recent Performance Factor for that network must be no less than 1.00. Changes to the pledged Load Relief for Direct Participants and ANRs enrolled in the Three-Year Incentive Period will be permitted to the extent specified in paragraph 4 below.
3. Each application must state the kW of Load Relief that the Direct Participant or Aggregator contracts to provide for the four Contracted Hours required for the network(s). Commencing with the 2015 Capability Period, applications for enrollment in the Three-Year Incentive Period must state the kW of Load Relief for each ANR. The weather-adjusted CBL will be used as the CBL Verification Methodology for each Con Edison account number enrolled, unless the application specifies that the average-day CBL is to be used for verification of performance. A single CBL Verification Methodology will be used for each customer to assess both energy (kWh) and demand (kW) Load Relief.
4. An Aggregator may enroll a new customer or customers in a new ANR or ANRs, each subject to its own Three-Year Incentive Period. A Direct Participant or Aggregator, per ANR, electing to participate for the Three-Year Incentive Period must pledge kW amounts for each of the three years on its enrollment application for the first year. The kW of pledged Load Relief on the enrollment application for the first year must state pledged kW amounts for each of the second and third Capability Periods that are equal to or greater than the kW of contracted Load Relief for the first Capability Period.
