

PSC NO: 10 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 04/23/2014  
Issued in compliance with order in Case 13-E-0573 dated 03/13/2014

Leaf: 260  
Revision: 3  
Superseding Revision: 2

## GENERAL RULES

### 24. Service Classification Riders (Available on Request) – Continued

#### RIDER S – COMMERCIAL SYSTEM RELIEF PROGRAM - Continued

##### F. Metering

1. Participation under this Rider requires that each participant's entire service be measured by interval metering with telecommunications capability used by the Company for monthly billing. If an Aggregator takes service under this Rider, all customers of the Aggregator must meet the metering and telecommunications requirements specified hereunder.
2. If, at the time of application for service under this Rider, the Company does not bill the participant monthly using interval metering, the Customer shall arrange for the furnishing and installation of interval metering with telecommunications capability to be used for billing and arrange for telecommunications service, at the participant's expense, net of any discount or rebate received by the participant. If metering that communicates by landline is requested, the Company will issue an invoice within three days of its receipt of the completed meter request. If metering that communicates wirelessly is requested, the Company will charge \$200.00 to visit the premises to determine whether or not this is viable. Within five business days of receiving payment, the Company will visit the premises to determine wireless viability and issue an invoice that: (a) if wireless communications are viable, contains the cost of the meter upgrade, the name of the wireless carrier that must be used by the participant, and the Electronic Serial Number ("ESN") that the participant must provide to the carrier to activate the Company's wireless modem, or (b) if wireless communications are not viable, contains the cost of a meter upgrade that requires use of a landline. The Company will not be required to meet the five business-day timeframe if there are reasons outside of the Company's control, such as a major storm or denial of access to the meter.
3. Participation under this Rider will commence the first day of the first Capability Period month that occurs after the Company's acceptance of a completed application and at least 30 days after both the interval metering and communications become operational, but no later than July 1 for the 2014 Capability Period and June 1 for subsequent Capability Periods. Direct Participants or Aggregators that do not have metering and/or telecommunications service operational by June 1 for the 2014 Capability Period and May 2 for subsequent Capability Periods will be subject to a penalty, as specified in section J.2, unless the delay was due to the Company's failure to install required metering within three weeks of the applicant's payment for a meter upgrade.
