

PSC No: 120 - Electricity  
New York State Electric and Gas Corporation  
Initial Effective Date: July 27, 2015  
Issued in compliance with Notice in Case 15-E-0033, dated January 15, 2015

Leaf No. 117.0.2  
Revision: 0  
Superseding Revision:

#### GENERAL INFORMATION

#### 22. Farm Waste Electric Generating System Option (Cont'd.)

##### I. Remote net Metering (Cont'd)

##### 4. Calculation and Application of net Metering Credits (Cont'd)

##### b. Facility Located and Used at Premises

In a month where the Host Account has Excess Generation, the Excess Generation will be converted to the monetary value at the Company's Service Classification No.10 Buy Back Service Energy only rate.

The remote net metering credit will first be applied to any outstanding charges on the Host Account's current electric bill. Any remaining monetary credit will be allocated between the Host Account and the Satellite Accounts. The portion designated for the Satellite Accounts will be applied to the Satellite Account bills as each subsequent Satellite Account bill is calculated. In the case of two Satellite Accounts billed on the same day, the credit will be applied to the highest usage account first.

The credit applied to each Host or Satellite Account shall not exceed the current electric delivery charges, and if applicable, Company supply charges. If a monetary credit remains after applying credits to all designated Satellite Accounts, the credit will be carried forward on the Host Account and the allocation process between Host and Satellite Accounts will repeat until the value of the excess credit is zero, or until all associated accounts are finalized.

##### J. Annual Reconciliation and Account Closure

##### 1. Annual reconciliation of remaining credits:

Any remaining monetary credits will be cashed out at avoided cost. For Non-Hourly Pricing customers, the cash-out payment shall be equal to the product of the kWh excess multiplied by the average avoided cost for the energy for the billing period in which the excess occurred. For Hourly Pricing customers, the payment shall be for the remaining portion of the excess credit priced at avoided cost. Upon the Company's determination that the customer has taken service under this Section 22 while in violation of the conditions of service set forth in this Schedule, the customer shall forfeit any positive balance accrued during the annual period in which the violation occurred.

##### 2. Host Account closure:

For Non-Hourly Pricing customers, any remaining monetary credits will be cashed out at avoided cost of the supply. The cash-out payment shall be equal to the product of the kWh excess balance multiplied by the average avoided cost for the energy for the billing period in which the excess occurred. For Hourly Pricing customers, the payment shall be for the remaining portion of the excess credit priced at avoided cost. Any remaining non-avoided cost monetary credits are reset to zero.
