

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 03/01/2015

Leaf: 79
Revision: 2
Superseding Revision: 1

GENERAL RULES

8. Customer Use of Generating Equipment and Electrical Energy Storage Equipment – Continued

8.3 Generating Facilities Used on an Emergency Basis for Export

The use of generating facilities at the premises for delivery to the Company's primary distribution feeders will be permitted on an emergency basis as follows: (1) when the generating equipment is operated at the direction of the NYISO under NYISO SCR procedures or EDRP procedures, or (2) at the direction of the Company under Rider O, S, or U. Delivery to the Company's secondary networks is prohibited. A Customer may not deliver to the Company's primary distribution feeders while it is receiving electric energy delivered by the Company.

A Customer operating its generating equipment on an emergency basis pursuant to this General Rule must comply with all Common Provisions of SC 11, including the Interconnection Charge and Determination of Demand, including establishment of a contract demand and installation of appropriate metering to measure the energy delivered to the Company's system. Further, such Customer is required to pay charges as would be required of Customers taking service under SC 11. The Customer will pay any costs associated with reinforcing the distribution system and/or adding facilities as may be required for load delivery.

The Company reserves the right to exclude a generator from connecting to the Company's primary distribution feeders when the Company deems it necessary to protect its system, facilities, or other Customers. In addition, the Company may prohibit a Customer from delivering power and energy to the Company's primary distribution feeders, or limit the amount of power and energy delivered, for operational reasons.

8.4 Electrical Energy Storage Equipment

The use of electrical energy storage equipment at the premises will be permitted provided that the interconnection is in compliance with the interconnection requirements, including the Interconnection Charge, specified in General Rule 20. The account will not be subject to Standby Service rates unless the storage is used with electric generating equipment subject to such rates.
