Re: Statement of Value of Distributed Energy Resources Cost Recovery

Dear Secretary Burgess:

Orange and Rockland Utilities, Inc. (the "Company") is filing a revision to the Statement of Value of Distributed Energy Resources ("VDER") Cost Recovery to its Schedule for Electric Service, P.S.C. No. 3 – Electricity (the "Electric Tariff") as follows:

VDER-CR – Statement No. 2 to P.S.C. No. 3 – ELECTRICITY

This Statement has an effective date of December 1, 2018.

The Statement is issued pursuant to General Information Section No. 27 of the Electric Tariff. It contains per-kWh and per-kW charges applicable to all customers served under the Electric Tariff to recover credits paid to customers served under the Value Stack Tariff under Rider N.

In addition, in compliance with Appendix B of the Public Service Commission's September 14, 2017 *Order on Phase One Value of Distributed Energy Resources Implementation Proposals, Cost Mitigation Issues, and Related Matters* in Case Nos. 15-E-0751 and 15-E-0082, the Environmental Component – Out-of-Market value for the demand-billed service classifications will be recovered on a per kWh basis rather than on a per kW basis.

The amount of VDER credits issued to customers for the recovery period is less than \$1,200.¹ At the levels to be recovered as of November 2018, the rates applicable to the Company's customers round to zero. Therefore, the share attributable to customers will be recovered in the following year's surcharges effective December 1, 2019.

Questions regarding this filing can be directed to Cheryl Ruggiero at (212) 460-3189.

Sincerely,

/s/

William A. Atzl, Jr.
Director – Rate Engineering

¹ Reflects actual credits issued through October 2018 and an estimate of November 2018 credits.
