Re: Case 15-E-0751, *In the Matter of the Value of Distributed Energy Resources*

Case 15-E-0082, *Proceeding on Motion of the Commission as to the Policies, Requirements and Conditions For Implementing a Community Net Metering Program*

Dear Secretary Burgess:

Consolidated Edison Company of New York, Inc. (“Con Edison” or the “Company”) hereby submits for filing with the Public Service Commission (the “Commission”) a revision to its Schedule for Electric Service, P.S.C. No. 10 – Electricity (the “Tariff”).

The revised Tariff Leaf, which is identified below, makes a change to Rider R – Net Metering and Value Stack Tariff for Customer-Generators. The revised Tariff Leaf has an effective date of November 12, 2017.

<u>Tariff Leaf No.</u>	<u>Revision No.</u>	<u>Superseding Revision</u>
253.2	1	0

Tariff Change

The Order on Phase One Value of Distributed Energy Resources Implementation Proposals, Cost Mitigation Issues, and Related Matters, issued September 14, 2017 (the “September Order”) in the above-referenced proceedings, directed each utility to file

tariff amendments implementing the Value Stack and cost recovery for credits paid under the Value Stack. Pursuant to the September Order, the Company filed tariff changes on October 17, 2017, to modify Rider N. These tariff changes became effective on November 1, 2017.

Following discussions with Department of Public Service Staff, the Company proposes a further tariff change to Rider R to clarify the Value Stack Capacity Component Credit – Alternative 3. Currently, Rider R states that the Value Stack Capacity Component Credit Alternative 3 is calculated by multiplying the New York Independent System Operator Installed Capacity market clearing price in effect during the current billing period, by the applicable reserve requirement, by the customer-generator’s net injection during the New York Control Area (“NYCA”) peak hour of the previous calendar year. The Company planned to include an adjustment to the credit for losses; however, the current Tariff does not include language related to the adjustment for losses. The Company is therefore amending the Tariff to state that the customer-generator’s net injection during the NYCA peak hour of the previous calendar year will be adjusted by the Factor of Adjustment for Losses as shown in General Rule 25.1.

Conclusion and Notice

The Tariff Leaf filed today is proposed to become effective November 12, 2017. Pursuant to Ordering Clause 23 of the September Order, the Commission waived the requirement for newspaper publication for the tariff changes filed on October 17, 2017 that became effective on November 1, 2017. Since today’s filing serves to clarify the provisions filed on October 17, 2017, the Company requests waiver of newspaper publication.

Any questions regarding this filing can be directed to Cheryl Ruggiero at (212) 460-3189.

Sincerely,

/s/ William A. Atzl, Jr.
Director
Rate Engineering Department
