Purpose of Filing

The Companies are filing amendments in compliance with Ordering Clause No. 1 of the Order. The Order directed the Companies to file revisions to the draft tariff leaves that were previously filed in compliance with the Order Establishing Net Metering Successor Tariff in Case No. 15-E-0751, issued on July 16, 2020.

Beginning January 1, 2022, a Mass Market Customer¹ that installs on-site electric generating facilities shall be subject to the Customer Benefit Contribution ("CBC") Charge. A demand-metered customer will not be subject to the CBC Charge. Additionally, a Community Distributed Generation project or Remote Crediting project will not be subject to the CBC Charge.

The CBC Charge recovers the costs associated with certain public benefit programs (*i.e.*, low income program, energy efficiency programs, and the clean energy programs) from these customers. The CBC Charge cannot be offset by credits for the customer's excess generation. The Order also specifies that on-site wind and on-site micro-hydroelectric generating facilities shall be billed the same CBC rate as customers with on-site solar generating facilities. A statement will be filed on not less than 15 days' notice setting for the CBC Charge by service classification.

Newspaper Publication

In accordance with Ordering Clause No. 3 of the Order, newspaper publication in accordance with Public Service Law 66(12)(b) and 16 NYCRR §720-8.1 is waived.

If there are any questions concerning this filing, please call Michael Seeley at (585)484-6645 or me at (585)484-6810.

Respectfully submitted,

Lori A. Cole
